OUR NEXT MEETING

July 23, 2020

Admin & Announcements

DATE CHANGE: QUARTERLY MEETING: FFCOI leadership continues to monitor the evolving nature of the COVID-19 pandemic. Regrettably, given the current situation we are canceling the April 2020 meeting. We will continue to stay connected via social media. If you have a project or effort where you would like the FFCOI community to help with – please reach out. We hope to stay connected during these difficult times, and hope that we can see everyone at the July meeting. As always contact [FFCOI](#) leadership if you have any questions or concerns, or want to suggest speakers to be considered for future meetings. Send us an [email](#) or a message on [LinkedIn](#). (POCs: [Sharaelle A. Grzesiak](#), [Robin Champ](#), [Eric Popiel](#), and [Joe Greenblott](#)).

Happenings and Requests

WORLD FUTURE DAY: On March 1st, 2020 [World Future Day](#) a group of futurists facilitated a global dialogue and engaged hundreds of great minds on future challenges. Beginning in New Zealand and ending in Hawaii, participants discussed a variety of concerns, challenges, and opportunities impacting the global commons. In a show of solidarity and unity, these conversations among strangers from diverse parts of the globe were conducted with civility represented what humanity can achieve when we choose to listen to each other. (POC: [Jerome Glenn](#))

THE FUTURE TODAY INSTITUTE'S 2020 TECH TRENDS REPORT: The 13th edition of the [Future Today Institute's tech trends report](#) is now available and offers deep research into strategic forces that will influence business, government, and society in the coming years. (POC: [Amy Webb](#))

REPORT: BUILDING A HEALTHY COGNITIVE IMMUNE SYSTEM: The Institute for the Future (IFFT) has released a new report on [building a healthy cognitive immune system](#). In order to preserve democracy, IFFT wanted to know how to develop a new immune mechanism, a new immune system, suited to today's realities. In this report, IFFT explores the need to upgrade our "cognitive immune systems" at individual and community levels. (POC: [Sean Ness](#))

WOVEN CITY: Toyota is building a 175-acre hydrogen-powered test city at the base of Mount Fuji in Japan. This project, "Woven City," will be a fully connected ecosystem where approximately 2,000 residents and researchers will test and develop technologies, such as autonomous vehicles, robotics, and smart homes. This "living laboratory" will be the first of its kind, built from the ground up using an infrastructure of the future to support a real-life, multi-generational community. "Woven City" is to be built in phases with the groundbreaking slated to start in 2021. For more information on this project visit [Woven City](#).

PRESCIENT FORESIGHT SANDBOX TRAINING: Registration for the [2020 Foresight Sandbox is open!](#) Prescient's 3-day strategic foresight training program combines foresight skills development with a deep dive into an area of emerging research and technology, and a focus on turning possibilities into action. The theme this year is the Future of Human Performance. How might insights into individual's performance be adapted for team, workforces and communities in the near future? (POC: [Prescient 2050](#))
